

Rodrigo Muller

Enterprise B2B SaaS & Financial Services

PROFESSIONAL SUMMARY

Product design leader with 12+ years in enterprise B2B SaaS and 4+ years managing design teams. I lead the Financial Services design vertical at Seismic, partnering with senior product and engineering leadership to set roadmap and delivery strategy for a multi-product portfolio. My work centers on scaling teams and design systems, modernizing legacy products through direct customer partnership, and making complex, highly regulated workflows clear and usable at enterprise scale.

CORE COMPETENCIES

Leadership	Design team management, hiring and team scaling, mentorship and career development, design operations, cross-functional collaboration, stakeholder management, public speaking
Strategy	Product strategy, roadmap definition, product vision, user research and discovery, competitive analysis, metrics and analytics, prioritization
Craft & Systems	Design systems, UI/UX design, interaction design, information architecture, wireframing and prototyping, usability testing, accessibility, Figma, AI-assisted design workflows
Domain	Enterprise B2B SaaS, financial services, compliance and governance UX, platform and marketplace design, workflow automation, enterprise integrations

PROFESSIONAL EXPERIENCE

Product Design Manager, Financial Services

2022 – Present

Seismic Software · Remote

- Lead product design for the Financial Services vertical, a portfolio spanning product modernization, governance and compliance, and content automation that represents an estimated \$400M to \$500M ARR opportunity for the business.
- Manage a team of four designers scaling to six and operate in a strategic triad with senior product management and engineering leadership to set vertical roadmap, staffing, and delivery priorities; led the organizational restructuring and team expansion that accelerated the compliance roadmap ahead of the annual customer conference.
- Led the strategic modernization of a legacy acquired product into an embedded platform experience, partnering with twelve wealth management firms as design partners to validate AI-assisted workflows and third-party integrations; delivered the pilot on schedule and earned the team a company MVP award.
- Directed a platform-wide governance and compliance initiative that replaced fragmented, per-application approval workflows with a single canonical nine-state model expressed across four product surfaces, scaled through a compliance design system and seven embedded designers across partner teams.
- Drove design strategy for a two-sided governed content distribution network connecting asset management and wealth management firms, resolving cross-tenant permissioning and audit-evidence problems; advanced the product from early access toward general availability for a major enterprise deployment.
- Mentor designers through complex modernization work, establishing repeatable practices for customer collaboration, design validation, and rapid iteration, including adoption of AI-assisted prototyping to increase team velocity.

Senior Product Designer

2016 – 2022

Seismic Software · Remote

- Set design direction for platform-wide initiatives, influencing and mentoring designers across multiple product teams.
- Championed design consistency and shared patterns across teams, reducing rework and improving cross-product coherence.
- Led user research and iterative prototyping to validate solutions with enterprise customers before build.

Creative Director

2014 – 2016

Seismic Software · San Diego, CA

- Built and led the design team through the company's early growth stage, establishing design process, review practices, and hiring standards.
- Owned end-to-end UI/UX for the core platform and translated enterprise client needs into shipped product experiences.
- Built and coded responsive front-end components, partnering directly with engineering on implementation quality.

EARLIER EXPERIENCE

- Creative Director, DecisionLogic, San Diego, CA**

2013

Led the design department; owned landing pages, product marketing site, and front-end implementation.
- Creative Manager, Bridgepoint Education, San Diego, CA**

2012 – 2013

Mentored junior designers and delivered responsive web interfaces for a large education platform.
- Project Manager / Art Director, Whack Media Design, San Diego, CA**

2004 – 2012

Managed client projects from concept to launch across UI, UX, and front-end delivery.

EDUCATION

- Bachelor of Fine Arts, Computer Art (3D Animation); Minor, Graphic Design**

1999 – 2003

Savannah College of Art and Design, Savannah, GA

PROFESSIONAL DEVELOPMENT

- AI in Financial Services: Foundations through Future Trends (three-course specialization)**

2026

Saïd Business School, University of Oxford (Coursera)
- Mastering Generative AI for Product Innovation (XAPRO210)**

2025

Stanford Online

ADDITIONAL

- Languages**

English (native), Spanish (native)
- Portfolio**

[RodrigoMuller.com](#) - case studies on governed content distribution, platform-wide compliance workflow design, and enterprise product modernization.
